DETAILED ACTION

Allowable Subject Matter

1. Claims 1-3 and 4 are allowed.
2. The following is an examiner's statement of reasons for allowance: The closest prior art, which is either Aharoni et al., US Patent NO. 6,014,694; or Deshpande, US Pub No. 2003/0076858, does not disclose that a first part of data is transmitted in order to measure the network capacity, and subsequently a second independently alternative part, which may be independently transmitted without the other alternative part, is chosen as a function of received data indicating network capacity, and that the first part and the second part are simultaneously presented in synchronization. Aharoni et al. discloses a method of using past data transmissions to determine network capacity, and choosing a video resolution accordingly (see col. 6 line 61 - col. 7 line 6; col. 7 line 67 - col. 8 line 18). What Aharoni does not disclose is that the "first part" is a part of the same data as the "second part" and that the first and second parts are presented simultaneously. Deshpande discloses transmitting a base layer of video, using this transmission to determine network capacity, and determining whether or not enough bandwidth is available to transmit enhancement layers. Deshpande does not disclose that the "second parts" are independently alternative, and are capable of being transmitted independently without regard for the other alternative second parts – rather, in Deshpande, the "second parts" are enhancement layers which are not alternatively independent of each other.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
